

Metric Century Route

1. Wacissa Pentecostal church at Tram and 59 (left hand side of tram)

This rest stop is the first one for the metric century and the third one for the full century riders. The metric century riders will have to cross the road to access the Church on their left (please watch for oncoming traffic). There will be a gazebo and Bathrooms here. We will have food for everyone since it will be the halfway point for the 100milers. It will be mile 18 for the metric century and mile 47 for the 100mile route. Everyone is taking a right on 59 after they leave your rest stop and taking it all the way to hwy 98.

2. Near hwy59 and hwy98 intersection

This will be the last stop before riders take a right on HWY 98. It will be a bit of a deserted rest stop but we will have SAG so just hold tight if you need to be picked up. Also make sure you have a cell phone in case anyone gets stranded. The next rest stop is at a Gas station so there are bathrooms and food etc if you need it. This will be a lightly stocked rest area

3. Kangaroo Gas station at bloxham cutoff and woodville hwy.

There are bathrooms and a convenience store here so take a break if you need to rest. The next rest stop has bathrooms also, but no AC. This is mile 73 for the 100 mile route and mile 44 for the metric century

4. Natural Bridge state park

This is the last bigger rest stop for the 100mile and metric century. There are bathrooms shade and the last stop with food. There will be one more stop before the end of the race but it is a minimal stop without much.
~ Mile 56 for the metric century.

5. Corner of southwood entrance and tram road

This is the closest stop to the fairgrounds at ~4mile from the Start/Finish. This is a low stocked stop.

Last rest stop for all route. It will be on the right hand side of the road at the entrance for Southwood.

It is important to follow the rules of the road when going back through capital circle NE.

This is a no food stop, water and cytomax only
